## United Media's Multicam Software supports new Matrox RT.X100 video capture card

**Anaheim Hills, California, USA - September 20, 2002.** United Media today announced Multicam Software, a plug-in to Adobe Premiere which lets video professionals effortlessly edit Multi-camera events on-the-fly using 2-4 camera sources, now supports the new Matrox RT.X100 professional video editing board. Multicam is the only software of its kind and gives the video professional superior flexibility and total creative control of editing multiple cameras at a very affordable price.

Matrox RT.X100 delivers many unique professional features that are not available on any other video editing cards in its class. It is ideal for corporate communicators, event videographers, project studios, educational facilities, and digital filmmakers.

"Multicam will save valuable time in post-production as well as take all the guess work out of editing between multiple cameras," said Leslie Ricci, United Media sales manager. Multicam provides a video output display in full 30 frames-per-second (25 fps PAL) for each camera source so you can view effortlessly all camera sources and slice & dice between 4-independent sources in realtime keeping everything fully in synch."

Multicam allows users to work with either 2 or 4 independent camera sources and cut between them in realtime, as if using a live switcher, but with all the flexibility and creative control of nonlinear editing. If you cut to the wrong camera source, no problem, just click Undo and select the right shot.

### Key Features of Multicam Software

- > **Create Better Videos:** You can see the output of each camera source easily during the editing process and select the best shot available.
- > **Save Valuable Time:** Cuts hours off your post-production work when editing a multi-camera sequence. Designed just for multi-camera editing and is much faster than using Adobe Premiere.
- > **Takes all the Guess work out of a Multi-Camera Edit:** Allows you to view, play, edit, slice & dice up to 4-independent camera sources at one time.
- > **Simulates a Live Camera Switch with all the Advantages of Nonlinear Editing.**
- > **Plug-in to Adobe Premiere:** Multicam integrates seamlessly with Adobe Premiere on the PC. After completing your Multi-camera edit in Multicam, easily export directly to Adobe Premiere's timeline for adding realtime effects and titles.

**About Multicam**

Multicam is the only software of its kind and is the perfect tool for editing multiple cameras. Multicam allows you to effortlessly sync, view, edit, slice & dice between 4-independent camera sources in realtime. Never before has there been a tool so easy to use and so affordable for Multi-camera editing.

Multicam is priced as follows:

Multicam 2-camera Software, \$299 USD

Multicam 4-camera Software, \$599 USD

Multicam is available and shipping from authorized resellers worldwide.
