

## UNITED MEDIA'S MULTICAM® SOFTWARE SUPPORTS PINNACLE PRO-ONE & DV500PLUS

**Easily sync, preview, scrub, cut and edit between multiple camera sources, as if simulating a live camera switch. Multicam is the ideal tool for any videographer working with multiple cameras: Weddings, Events, Recitals, Corporate, Interviews, Broadcast, Sporting and Music Videos.**

**ANAHEIM HILLS, CALIFORNIA - February 26, 2002** - United Media announced today the popular Multicam Software is now available for support of Pinnacle Pro-ONE and DV500Plus realtime editing platforms. Multicam allows you to effortlessly synchronize and view multiple camera sources and precisely edit between them without losing their reference points. Multicam is available in both a 2-camera and 4-camera solution through authorized Resellers worldwide.

**Multicam 2-camera Software, \$299 USD**

**Multicam 4-camera Software, \$599 USD**

Both Multicam 2-camera and Multicam 4-camera works in conjunction with Adobe Premiere and is now available and shipping worldwide. Multicam 2-camera is upgradeable to Multicam 4-camera.

Multicam saves valuable time in post-production and provides greater creative freedom when editing between multiple cameras. Never before has there been such an affordable tool to achieve multi-camera editing. Easily synchronize both video and audio, quickly select cut points between multiple cameras - all without losing synchronization between the independent camera sources. After completing the multi-camera edit you can easily export directly to the Adobe Premiere timeline for adding realtime titles and effects. Synchronizing and editing between multiple camera sources has never been easier, faster nor more affordable!

"Pinnacle Systems is excited to see United Media support Pinnacle Pro-ONE and DV500Plus with their Multicam software. Multicam's ability to use Pinnacle Systems hardware to see up to four cameras in real-time, playing off IDE drives is a great plus," said Dennis Radeke, Pinnacle Systems System Integration Manager. "Using Multicam with Pinnacle Pro-ONE and DV500Plus helps save time and create better productions by selecting the best available shot."

"We are very pleased to announce our release of Multicam for support of the Pinnacle Pro-ONE and DV500Plus products. For event videographers editing multiple-camera events, Multicam & Pinnacle Pro-ONE or DV500Plus make a very powerful combination," said Leslie Ricci, United Media Sales Manager. "You can easily view and edit a multi-camera event while enjoying the creative freedom of nonlinear editing."
